Broadband and Phone Price List

For customers who sign up to Broadband and
Phone Services from 4th October 2021

Version number: 1.3

Date published: 17/06/2022

Annual Price Changes

When you join Shell Energy Broadband, each April, we may, at our discretion, adjust the price of all your charges (including your price plan charges) by the Consumer Price Index (CPI) rate of inflation which is published by the [Office for National Statistics](#) in January of each year except where the CPI figure is negative. We will then add up to 3%. For example, if you're paying £20 a month, and the January CPI figure is 2%, we may apply an increase of up to 5%. At 5%, your monthly price would increase to £21 after 1 April.

If, however, the January CPI figure is -2%, we may apply an increase of up to 3%. At 3%, your monthly price would increase to £20.60 after 1 April. For details, see our [Annual CPI Price Increase Guide](#).

Prices (as well as any other terms) might also change for other reasons at any time whilst you're with us. We'll usually provide you with at least one month's notice before any such changes take place. See shellenergy.co.uk/broadband-terms for details.

What does this mean for the prices shown in this Price List?

This means the charges shown in this Price List (broadband, line rental, call plans, features and some call charges) may be increased each year from April 2023 by the Consumer Price Index rate of inflation which is published in January of each year (except where that CPI figure is negative) together with a further 3%.

Only one Shell Energy Fuel Saving is available per Premises, even if you are both an energy and broadband customer. Your allowance will be refreshed on the 1st of each calendar month. If you do not use your Shell Energy Fuel Saving in any given month then it will be lost and cannot be rolled over and used in another month.

9. Your monthly Charges will increase each year on 1 April from 2022 by the annual percentage increase in the rate of inflation as measured by Consumer Price Index (CPI) as published by the Office for National Statistics in January of the same year, plus up to 3%. If you enter into your Agreement with us between 9 January and 1 April, you will not be subject to this increase on 1 April in the first year of your Agreement, but you will in all subsequent years of your Agreement.
10. Average download speeds are based on the download speeds of at least 50% of customers at peak time. (8pm - 10pm). Broadband speed can be affected by the quality of your phone line, how far your home is from the telephone exchange or cabinet, the wiring in your home, electrical interference and how many people are using the sites you're visiting. We'll use your postcode and phone number (if you provide it) to give you a personalised estimate of the speeds you can expect to receive.

Example

If you are a **Fast Broadband** customer on an 18 month Minimum Period that commences on 1st November 2016 and the Service is terminated on 15th November 2017, you would be required to pay £35.86. This is calculated as follows:

2. Early Termination Charge applicable 1st December – 30th April 2018 = $£6.50 \times 5$ months = **£32.50**.
